Dear Ms. Clarke:

Re: Notification Letter for Site #5720 located at the Junction of Hwy 39 and Hwy 20, Alsike, Alberta

I would like to inform Safety Codes Council (SCC) that the contaminated soil underneath the on-site buildings (the store building and the garage) could not be excavated as the structural stability will be compromised by doing so. Therefore, the residual contaminated soil underneath the on-site buildings will be risk managed.

As per previous correspondence with Karen Gervais of Alberta Environment (AENV), any residual contaminated soil remaining after remediation is required to be risk managed. The proposed risk management plan is also required to be reviewed and approved by AENV.

KC will ensure that the excavated contaminated soil will be remediated to the appropriate criteria prior to backfilling. A remediation report, a proposed risk management plan and the commitment letter will be submitted to Safety Codes Council and AENV, once the excavated contaminated soil has been remediated to the applicable criteria and the site backfilled.

If you have any questions or need clarification on any of the points presented herein please contact the undersigned at your earliest convenience.

Sincerely Yours,

KC Environmental Group Ltd.

Bryan Armstrong, MEng, PEng
Senior Environmental Engineer

Dear Harold Blize:

DUPLICATE

Re: Revised Remediation Plan for Site 5720, Alsike General Store

Thank you for submitting the Revised Remediation Proposal dated September 3, 2003 and received September 5, 2003, which was prepared by your consultant, KC Environmental Group Ltd. Our Technical Committee is currently reviewing your proposal and you will be notified in writing of the outcome, once that process is complete.

Please note that no work is to be started until the review is complete and the Safety Codes Council has accepted the remediation plan. Should you have any questions about your file or the program in general, please contact me at (780) 415-8671, or toll-free at 1-866-833-3300.

Yours truly,

Karen Clarke
Technical Coordinator
