To: Whom it may concern

Re: Overburden from the Ministry of Highways and Infrastructure's gravel pit on the NE-7-50-19-W3 east of Mervin Saskatchewan.

The Ministry will remove the overburden on the south and west sides of our pit if required by the new owners.

Normally over burden is topsoil that is used to landscape a gravel pit once it is depleted but we can move it when requested.

The overburden from the private pit on the east side that was placed on Ministry property without permission will be used for eventual landscaping in the future.

Sincerely
